VIOLATION OF HEALTH AND SAFETY PLAN - ALP-022-93

On April 29, the EG&G Corporate Evaluations of Radiological Protection (CERP) team visited the Operable Unit No. 2 (OU 2) drilling operations inside the Americium Zone. Several deficiencies were identified as a result of the evaluation and have been included in the EG&G Corporate Rocky Flats Radiological Evaluation Report. While most of these deficiencies are not the fault or responsibility of Woodward Clyde, some are.

Specifically, the drill site and step off pad were not in compliance with the radiological posting requirements and were in violation of the OU2 Health and Safety Plan. In the future, all postings will be in accordance with approved procedures. Woodward-Clyde is directed to strictly comply with this request. A second Health and Safety violation will result in loss of the contract.

It is my understanding that the step-off pad was not posted due to a miscommunication in response to an Occupational Safety and Health Administration (OSHA) finding. Therefore, directions to change health and safety practices will not be followed unless these are in writing and approved by Keith Anderson, Environmental Restoration Management Health and Safety, or his designee. This will not include directions issued due to immediate dangers to safety or health.
